Dear Bill,

Technical Assessment 215 - EXELOO III Unisex Self Cleaning Toilet

We note that you have applied to revalidate Technical Assessment TA 215 for a further three years. Whilst the revalidation is being undertaken we advise that the current Technical Assessment will remain valid. Previously, CSIRO Appraisals had assessed the EXELOO III to the 2001 edition of AS 1428.1: 'Design for access and mobility - General requirements for access - New building work'. In the Opinion of CSIRO Appraisals the design meets all the performance criteria required for a WC compartment as set out in AS 1428.1 - 2001 for wheelchair access. At the time of this assessment, a CSIRO representative inspected a number of installations of the EXELOO III. These inspections confirmed that the number of minor changes made the unit's specifications since the original assessment would not affect the unit in meeting the requirements of the AS 1428.1- 2001. This assessment will now form part of this revalidation process/

This letter in conjunction with a copy of the original assessment should be sufficient for clarification of the status of the Technical Assessment until the revalidation is complete and a new Appraisal Certificate is issued.

We trust this is suitable for your purposes and if you require any further assistance please contact me.

Yours Sincerely

Paul Bailey
CSIRO Appraisals
